**Acidity regulators:**

Due to the exchange rate and increasing price of raw material, corn, prices of citric acid products keep increasing this week, but in a small range, some factories still stop quoting. Market demand continued to rise. Customers who want to occupy the market asap , please contact me to get the best quotation.

**Vitamins:**

Most products have stabilized, but some factories stopped quoting prices this week. If you have any needs, please chat privately.

**Sweeteners:**

Most products in the sweetener market have seen a small price reduction, with erythritol seeing a larger price reduction.

**Thickeners:**

It is still necessary to emphasize our most important core product.

**Nutritional Supplement:**

Some products have seen a slight price reduction, such as Creatine monohydrate.

**Humectant & Preservatives:**

The price is relatively stable, and the price of sodium benzoate has dropped.

**Sodium bicarbonate:**

This week, the price of soda ash has dropped, and Sodium bicarbonate has dropped significantly compared to last week.

Under the current market trend, our increased orders in the past few weeks are concentrated on **Maltitol, Xanthan Gum, Erythritol and Fumaric acid**. The following is the FOB price for your reference. The unstable international situation bring great challenges for chemicals' s importing , please pay close attention on market change together with Polifar to move quick decision
